Alternate #2	Herpes and STDs	Confidence	1.1%
Alternate #3	Viral Infections (Warts, Molluscum)	Confidence	0.8%

Visual Evidence & Attention Heatmaps

Clinical Description & Guidance

Partial or complete loss of hair from the scalp or body. Can be temporary or permanent, depending on the cause.

First Aid / Actions:	• Gentle scalp massage with natural oils (coconut, castor oil) to improve blood circulation • Use a mild, sulfate-free shampoo • Take biotin supplements (consult doctor for dosage) • Protect the scalp from sun exposure with hats or SPF spray
Dos:	• Eat a balanced diet rich in iron, zinc, vitamin D, and protein • Manage stress through exercise, meditation, or counseling • Be gentle when brushing — use a wide-toothed comb on wet hair
Don'ts:	• Avoid tight hairstyles (ponytails, braids) that pull on hair roots • Do not use harsh chemical treatments, excessive heat styling • Avoid crash diets — sudden weight loss can trigger hair shedding
